

Emissions Message 3

Emissions Notes:

This part is legal under the provisions of EPA's Tampering Policy dated November 23rd, 2020. The company has reasonable basis (test results) to verify that this product allows the vehicle to operate within legal emissions standards and is therefore **legal to be sold for on-street use in all states that accept the legal provisions of the Clean Air Act and the EPA Tampering Policy**. This product is **NOT LEGAL FOR SALE OR USE IN THE STATE OF CALIFORNIA** unless one of the two below conditions is met:

- It will be used on 1965 and older U.S. manufactured California Certified vehicles
- It will be installed on vehicles used solely for the purposes of closed competition racing.
 - Racing Use Only Vehicles are those vehicles that are used exclusively for competition and that are not registered, will never become registered, and will never be used on streets or highways.

Other states have adopted some or all of CARB emissions standards, therefore, it is incumbent on the consumer to check all applicable emissions laws in their state prior to purchasing and installing this product on their vehicle.

Installation of parts which are not CARB approved on a pollution-controlled vehicle in the state of California, or in any state that has adopted CARB emissions standards and requires EO numbers for exceptions, may result in the Department or Bureau of Motor Vehicles (DMV or BMV) revoking the vehicle registration and certificate of ownership (title), refusing the transfer of registration, and/or the vehicle failing smog inspection. Law enforcement may cite you for the use of an illegal aftermarket part and seize your title and license plate.

States that have adopted some or all of the CARB emissions standards include California, Colorado, Connecticut, Delaware, Maine, Maryland, Massachusetts, New Jersey, New Mexico, New York, Oregon, Pennsylvania, Rhode Island, Vermont, Washington, & Washington D.C.

Motor vehicle emissions standards are intended to help achieve and maintain air quality goals that benefit human health and the environment. The U.S. Environmental Protection Agency, the California Air Resources Board, Environment Canada, and other regulatory agencies prohibit the operation of vehicles on public roads that violate applicable emissions standards. The alteration of certified production vehicles to modify, remove, or render inoperable emissions control hardware or software, known as "tampering" is prohibited by the U.S. Clean Air Act and other laws. Tampering with motor vehicle emissions control systems is punishable by substantial monetary penalties.

JEGS Automotive, LLC is committed to performance parts that allow enthusiasts and racers to modify their vehicles and meet emission requirements. The information provided here is intended to provide general guidance of interest to most consumers. This guidance may not apply to all vehicles or all situations. **It is up to each consumer to evaluate his or her own situation and take the steps necessary to comply with applicable laws.** The websites listed below have more information about regulations

and policies pertaining to motor vehicle emissions. You should also check the regulations applicable to your local area.
