TECH SPECS

01. Small sipes can reduce heat generation.
02. Large blocks on tread pattern increase grip off road.
03. Tire shoulder block design improves lateral grip and impact resistance.
04. Large deep groove pattern greatly improves grip while providing higher wear resistance.
05. Two layer seamless wrap tape tightens tires to further enhance high speed durability and impact resistance.
06. Double-layer high-strength belt steel wire to ensure the performance of the tire. Special airtight formula to ensure tire tightness.
07. Large block pattern design extends to the sidewall, greatly improving the sidewall impact resistance.
08. Sidewall protruding small pattern, to further improve the sidewall impact resistance.
09. Thick base rubber design protects tire - is not easily punctured.
10. The rim protector design protects the rim from shock damage.
11. 3-Ply polyester sidewall carcass design improves tire stability at high speeds, while also improving durability and impact resistance.
12. Single high-strength steel wire seamless seaming - tire and the rim tightly integrate to further protect the tire safety.
