

Installation Instructions for 11111 GM Style Headlight Switch Pigtail

Installation Instructions:

Wire #	Wire Color	Description
1	Red	Battery input from fuse block
2	DK Green	Wire going to dash lights
3	LT Blue	Wire going to dimmer switch
4	LT Green	Wire going to park lights
5	Tan	Wire going to tail lights
6	White	Dome and interior light ground

NOTE: On some switches, wire terminal #4 is omitted. The terminal next to #5 (shown dashed) will become the park light output.

Dome light ground is the terminal to activate the dome light when the switch is turned to the left.

CAUTION: This is a grounding terminal only.
