

Installation Instructions for 23670 Heating Pad

Installation Instructions:

- 1) Apply heating pad to clean area. Make sure the area it is being applied to will not be damaged by heat (i.e. – paint, coatings, etc.)
- 2) Make sure heating pad has 100% contact. No area of the heating pad should be hanging over a surface edge.
- 3) Attach using supplied springs or other method that will not be affected by the heat.

Warning: The heater may be hot. Surface heats rapidly. Burns may result from touching heater surface. Heater cools slowly after disconnecting power. Keep away from water. Do not clean in solvents.
